

Unit II Essay Outline Assignment

AP Biology, October, 06

For the question below, create a comprehensive *Outline* to answer the questions. Do *not* write an essay, but only create a detailed outline that would be used to construct your final essay. FYI, a typical outline would be about a page long or so. You might require more space, depending on the topic. Assignment will be due on Thurs., Oct. 26.

Describe the operon hypothesis and discuss how it explains the control of messenger RNA production and the regulation of protein synthesis in bacterial cells.

Remember to include the following!

1. A strong thesis statement with logical supporting points.
2. Body paragraphs that discuss the supporting points in the order they are mentioned in the thesis statement.
3. Good transitions between paragraphs.
4. A conclusion which summarizes what has been said in the body of the paper.
5. Appropriate diction and tone.
